Subject: RE: Invitation to supply a quote for a PFAS Event conclusion press release

Rick,

I am leaving today to make the trip and will see if I can put something together. I left you a phone message yesterday, I'm trying to make plans for the way back to Charleston and I have a meeting in the northern part of the state on Thursday and was wanting to know what the expectations were of the panel member as far as staying through 9:00 pm, which appears to be the closing of the public meeting?

You can call me on my cell if you need to . 304-206-5424

Scott

Subject: Invitation to supply a quote for a PFAS Event conclusion press release

Hi Scott,

EPA HQs is planning on issuing a press release at the end of tomorrow's PFAS Community Engagement Event. They would like to get some quotes from participants. Would you be willing and able to provide a quote, preferably today, but it could work tomorrow. Written would be great but if you are comfortable doing it verbally tomorrow on the fly, that would work, too.

The press release would be very similar to the one issued at the end of the New England PFAS event. If you want to check that out, here's a link to it:

<https://www.epa.gov/newsreleases/epa-concludes-historic-pfas-community-engagement-event-new-hampshire>

I understand that you might already be on your way and might also need to get that approved. Could let me know either way if this will be possible.

Thanks,

Rick
